1. Trepca has been and is engaged in exploring and developing a newly discovered lead zinc deposit. This deposit is located about 40 kilometers northeast of Trepca. At present they have about 9,000,000 tons of lead zinc ore in sight although it is not yet blocked out and exploration is continuing.
2. Trepca lead production is being increased from 60 to 80,000 tons per year, largely due to ore obtained from the new deposit.
